# 1 Introduction

This document describes the details of QEFS Explorer tool which is used to access the file system of Quectel BG95 module.

QEFS Explorer can be used to create or delete directories under the file system of BG95. Also, it can be used to upload files to the file system or download files from the file system. Through this tool customers can better manage the file system of BG95.

## 2 Operation Procedure

### 2.1. Start the Tool

**Step 1:** Double-click the icon as shown below to open the tool.

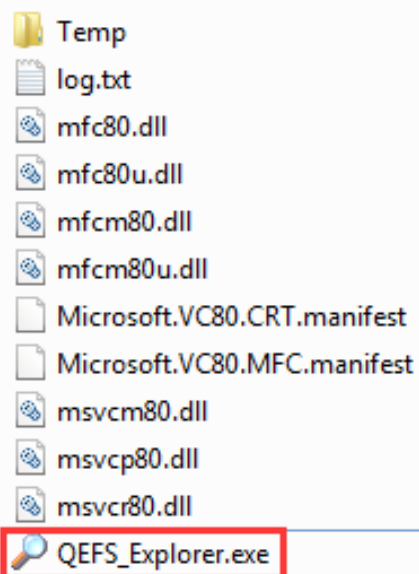

Figure 1: Open QEFS Explorer Tool

The tool UI is shown as below:

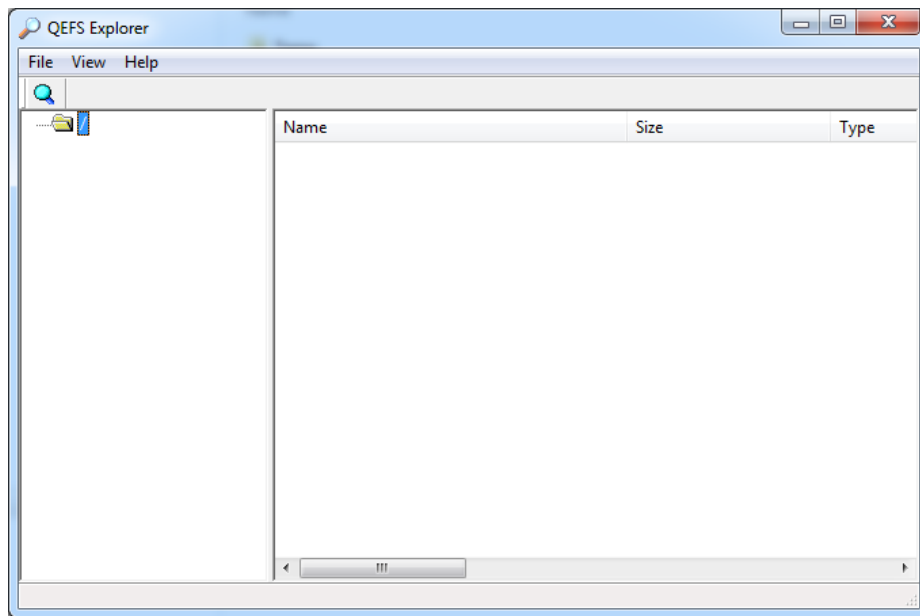

Figure 2: QEFS Explorer Tool UI

**Step 2:** Connect BG95 module to PC and then power on the module. When the module is ready, the port enumeration will be available in Device Manager, as shown below. The DM port (COM55) will be used as the communication port between QEFS Explorer and BG95.

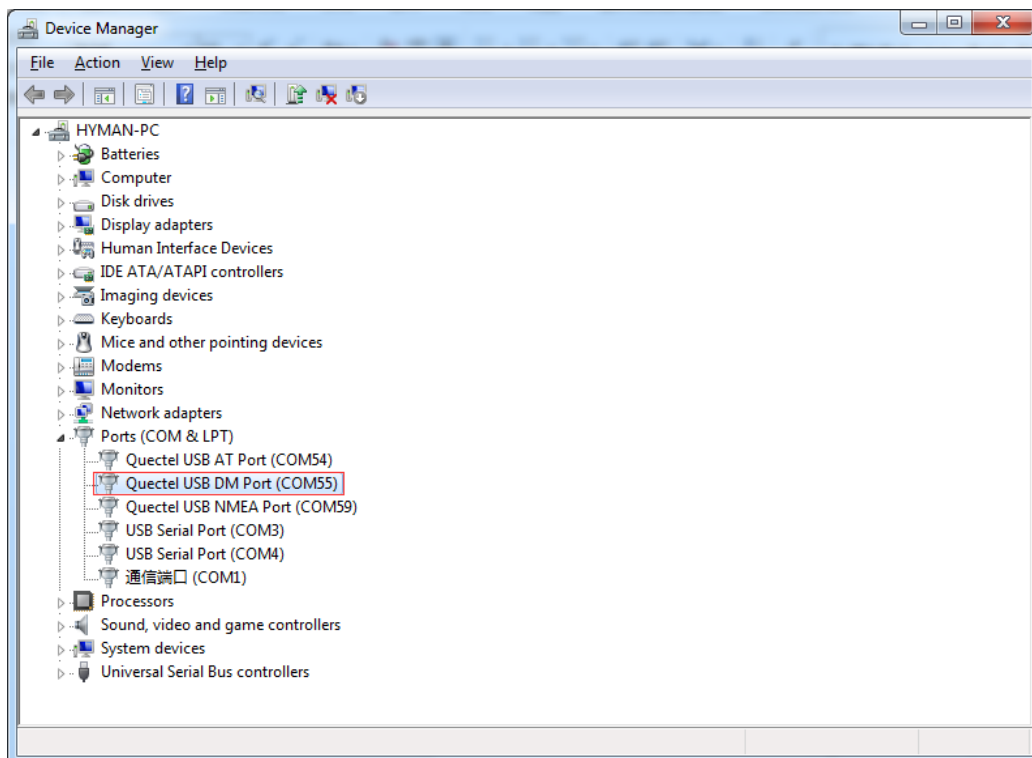

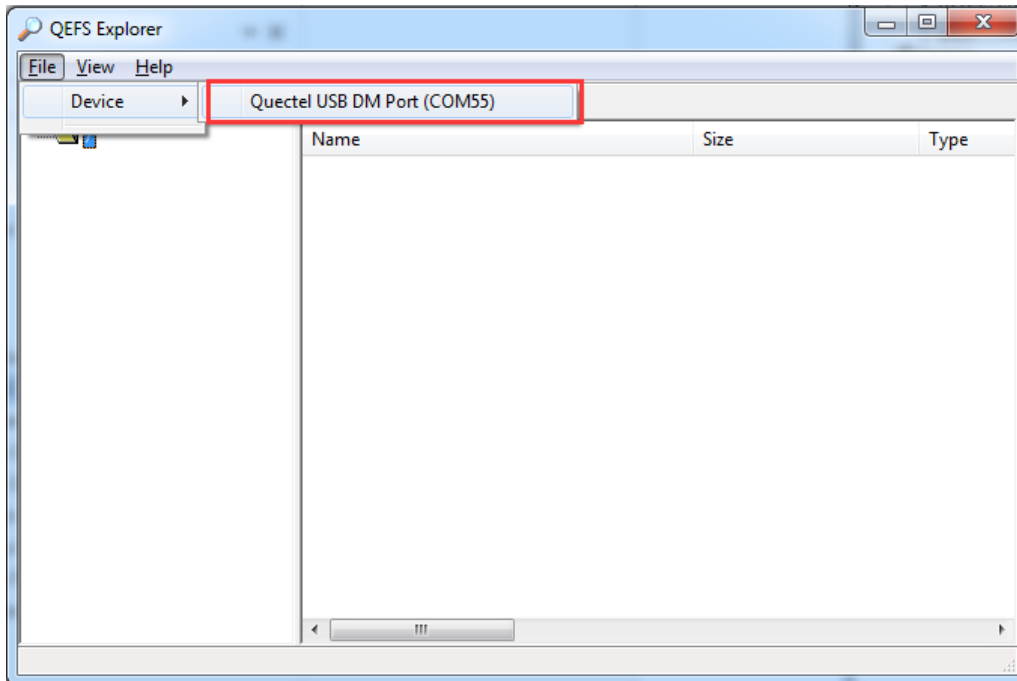

Figure 3: DM Port in Device Manager

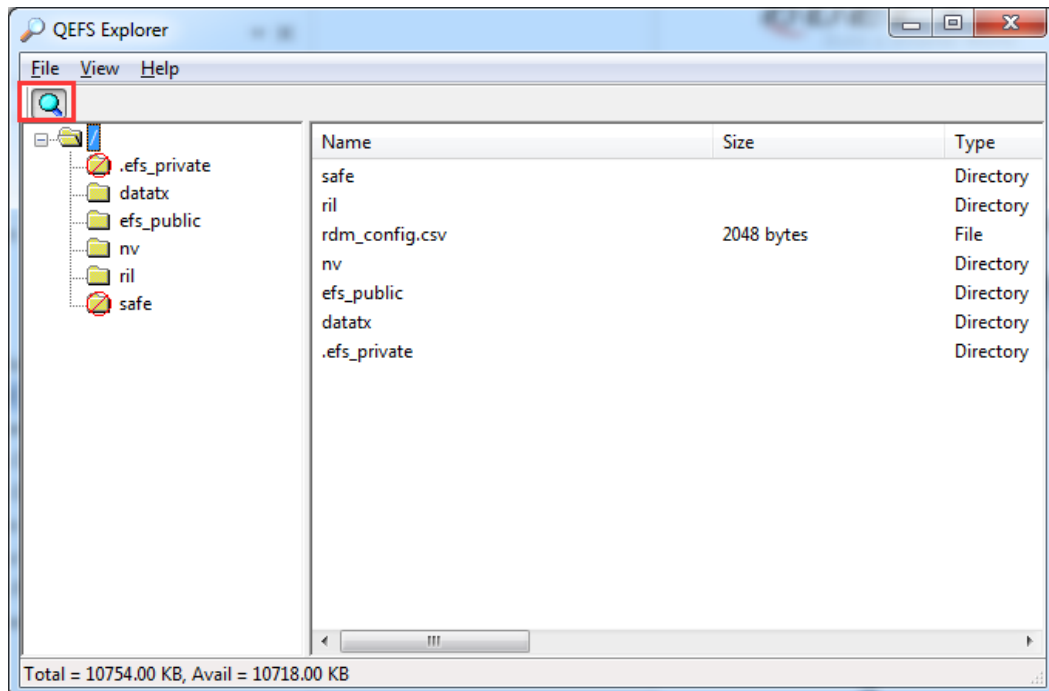

**Step 3:** Click “File” → “Device”, the DM port will be shown, as illustrated in the screenshot below.

**Figure 4: Select DM Port**

Select the DM port and click the button in the red box to complete connection. Then the files in BG95 file system will be listed in the tool, as shown below.

**Figure 5: Enter BG95 File System**

## 2.2. Directory Operation

### 2.2.1. Create a Directory

**Step 1:** Click “File” → “New” → “Directory” to create a directory under the root directory. For creating a subdirectory, select the higher layer directory first and then perform the steps above.

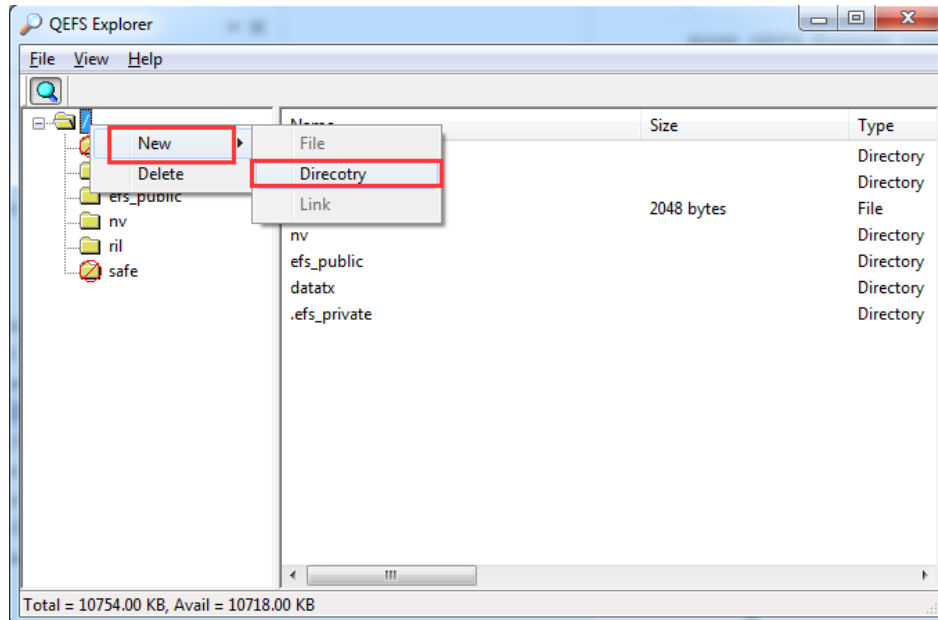

Figure 6: Create a New Directory

**Step 2:** Name the newly created directory, by taking “TEST” as an example as shown below.

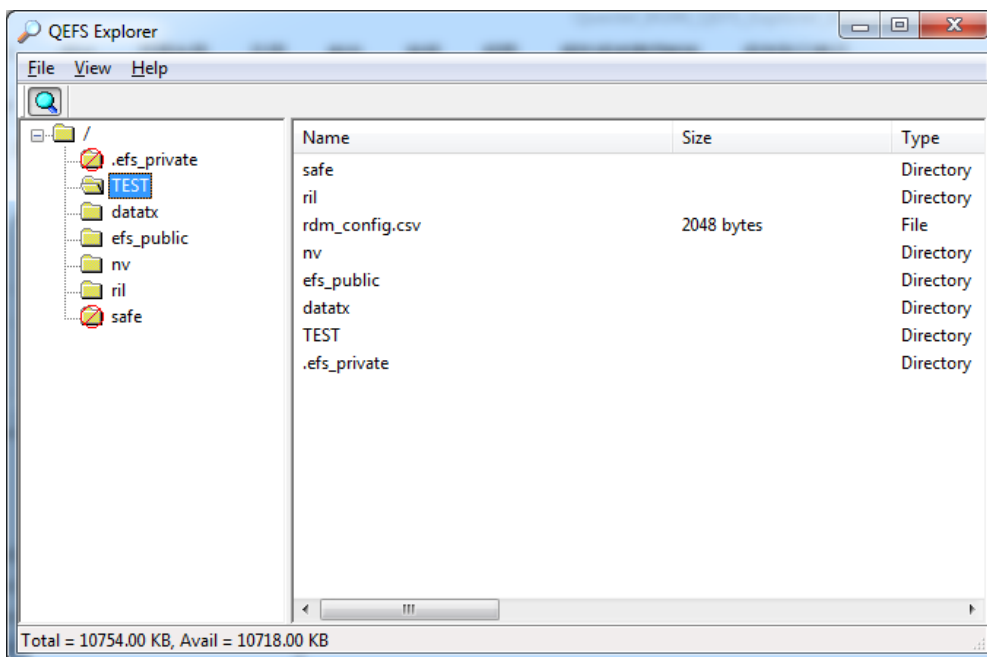

Figure 7: New Directory Created Successfully

## 2.2.2. Delete a Directory

Right click the directory to be deleted and then select “Delete”.

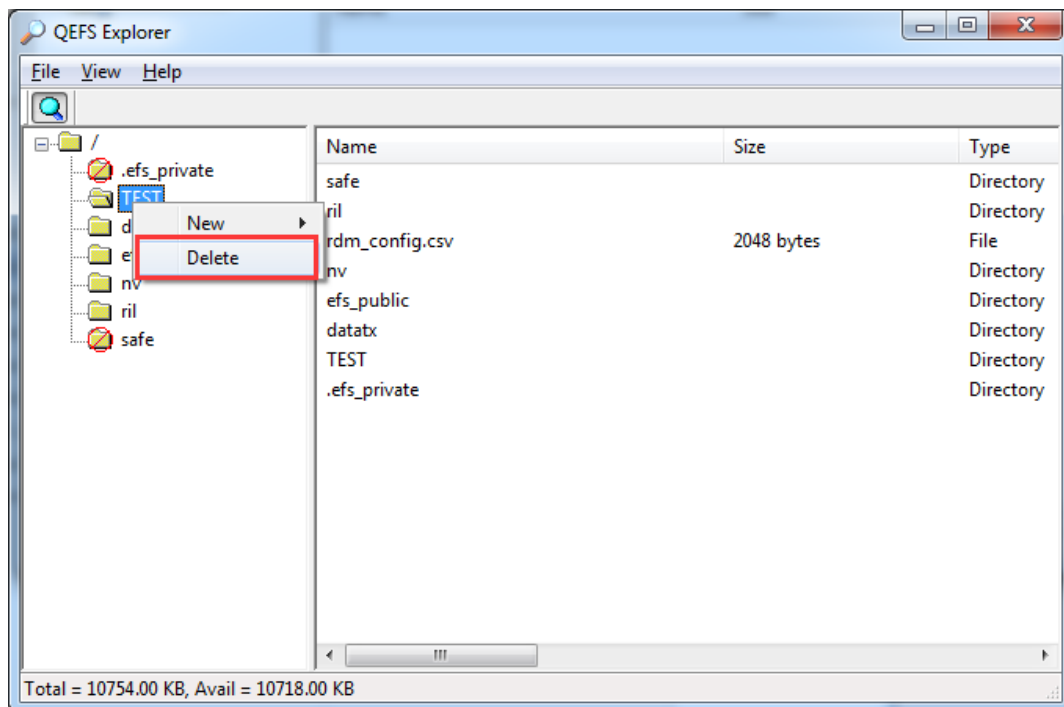

Figure 8: Delete a Specified Directory

## 2.3. File Operation

### 2.3.1. Upload a File

A file can be uploaded simply through dragging it into the specified directory. When the following window prompts up, please click “OK” to complete uploading.
